DANGER OF GOLD EXPORP EE-GARDED AS IMMINENT,

tries Gain Slowly or Not at All-Metals

Co.'s Weekly Review of Trade, which issues tomorrow will say: No gold goes out, though sterling exchange has risen close to the exporting point and it does not yet appear that the syndicate has made any effort to control the The exchange market. London has sold about 40,000 shares of stock during the week and the market is distinctly lower for railroad shares, though a shade stronger for trusts. The stock markets wait abjectly for London and foreigners show thus far more disposition to sell than to buy.

Withdrawal of gold by redemption of legal tender has not ceased, but since the closing of the syndicate contracts have averaged about \$120,000 per day. Wheat is 1% cents higher but clearly

not because western receipts are a trifie less than a year ago, not because exports from the Ttlantic coast are small. Spasms of speculative activity must be expected during every season and when prices are at the bottom such spasms can only mean an advance. Nothing is een to justify any material rise, as supplies in sight do not de-crease more than they would naturally crease more than they would naturally on account of bad weather. Corn is only a shade higher, with western receipts much smaller than last year. Cotten dropped a week ago to 2.56 cents, the lowest point ever known since moderate classifications were adopted, and has not yet risen though the talk of a great reduction in acreage this year is as vigorous as ever. The whole market turns on the fact that stocks of American cotton here and abroad are considerably larger and abroad are considerably larger

where they make any. Little is said of the stoppage of the Edgar Thompson steel works, though many thousand hands depend on its operation, because the Carnegie company has purchased fifty thousand tons of bessemer pig at \$9.95 to \$10 at Pittsburg, a price indi-cating that the biggest concern in cating that the biggest concern in western Pennsylvania does not make iron for less. At other markets plg iron has been quiet and elswhere, as at Pittsburg, structural iron orders account for a large share of the new buniness reported, though activity in wire wire rods and barbed wire continues. Bar tron and steel are firmer at Pitts. Bar iron and steel are firmer at Pittsburg, but without change in quota-tions and on the whole the reduced consumption in January does not seem to have more than matched the reduced production. In the minor metals there is more business, in lake copper at 9.65 cents with some offerings at 9.65 cents and forced values have depressed lead to 3.21 cents. Tin is also weaker at 13.1 cents with chavy importations.

Te market for cotton goods is fairly active and the demand improves in some grades, but is on the whole decidedly disappointing, though this week there has been no sensational reduction in prices. Undoubtedly the accumulation of goods continues, and is most dangerous for the trade. The sales of wool at three chief markets during the past month have been 20, 303,550 pounds against 18,444,131 last year and 23,189,000 for the same weeks two years ago, and while the mills maken. two years ago, and while the mills making low grade goods are fairly supplied with orders, it is a most unwholsome feature that numerous cancellations are reported, indicating that the goods supplied at exceptionally low prices do Jacksonville
On the other hand, the demand for the goods of a better grade seems a little better than the second of t

February ends and March begins with tangible, though not as yet satisfactory, signs of improvement. Larger easter jobbers of droy goods report the trade meeting present wants only, that foreign dress goods are inactive and competitive domestic fabrics correspondingly slow. Heavy arrivals of foreign wool depressed the market. Domestic mills are gradually filling spring orders.

Exports of wheat (including flour as wheat) both coasts of the United wheat) both coasts of the States, this week amount to 2,889,000 bushels against 1,108,000 last week, 2,972,000 in the week a year ago, 28,2,990 in the week a year ago, a.s.t. 900 bushels in the last week of February, 1893, and 2,698,990 bushels in the corresponding week of 1892. The independent calculations as to the wheat remaining in the United States March 1, 1895, indicate the total quantity in the country back of available supplies to be somewhat in excess of 190,890,090. to be somewhat in excess of 100,000,000 bushels as compared with perhaps 140,000,000 bushels a year ago. The approximate quantity of wheat at available points throughout the United States and back of the same at the present time is about 204,000,000 bushels, whereas one year ago the cor-responding total was 146,000,000 bushels. Stock speculation in New York has been irregular, Rearish influences were aroused by the advance of exchange rates and the accompanying advance revived foreign or public in-terest in the market. The selling, however, seems to have been mainly short stock and at the end of the week there is a rally on the short interest, due to the absence of gold shipments.
